Boil Water Advisory Lifted for

City of Fruitland

February 2, 2018

Public Water System ID # 0220008

The City of Fruitland issued a precautionary boil water advisory on January 31st to residents of the City of Fruitland, and Morris Mill vicinity that are connected to Fruitland water service. The City of Fruitland and the Maryland Department of the Environment have determined that it is no longer necessary to boil water prior to consumption. We are pleased to report that all coliform bacteria samples collected after water service was restored on January 31st are negative. Residents and business owners should flush consumption taps such as kitchen faucets for several minutes before resuming consumption of tap water. Residents and business owners should dispose of any ice that was made after 8:00 PM on January 31st. Area food service establishments that were closed are now permitted to reopen to serve the public. This precautionary advisory was issued because of the increased potential contamination risks following an emergency water outage. We apologize for any inconvenience.

For more information, please contact Fruitland City Hall at 410-548-2800 or the Maryland Department of the Environment at (410) 537-3706.
